RevPAR grows 4.6% – That’s the second-strongest growth in 2017 after the March increase of 5.1%. It also marked the 94th month of consecutive RevPAR growth.

Demand increases 4.3% – That’s the second-strongest growth in the last 35 months (March 2017 demand +4.5%), which means demand grew faster than in any month in 2016 and in 11 months of 2015.

Minus Florida and Texas, RevPAR rose 2.4%, demand jumped 3.1% – So it seems obvious that the U.S. results are skewed mightily by Texas and Florida.

Strong December lifts full-year RevPAR growth to 3% – That’s well above the 2.3% STR had projected at the ALIS conference in January 2017.
